

ACCUMULATORS & ACCUMULATOR-DRIERS

All of the accumulators shown below have 1-5/8" diameter copper shells. Shell dimensions of the accumulator-driers are the same as the accumulators, the only difference being that the accumulator-driers contain our monel wire cloth desiccant bag of 22 grams of silica gel.

Part numbers shown below designate accumulator-driers. *If an accumulator only is desired, this must be specified when ordering by adding an "A" to the part number.

Accumulators and accumulator-driers may be mounted slightly inclined, horizontally or vertically.

*Covered by Patent Nos. 2623607, 2770317 and Patents Pending.
